

Demonstration of Proposed Features

Date	15 July 2026
Team ID	SWTID-2026-4288
Project Name	Credit card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Collects applicant details such as income, age, occupation, education, and credit history.	Implemented	Yes	-
2	Credit Card Approval Prediction	Uses the trained Random Forest model to predict whether the application is approved or rejected.	Implemented	Yes	-
3	Result Display	Displays the prediction result (Approved/Rejected) with appropriate messages and icons.	Implemented	Yes	-
4	Data Preprocessing	Performs label encoding, feature selection, and data preparation before model training.	Implemented	Yes	-
5	Model Evaluation	Evaluates the Random Forest model using Accuracy, Precision, Recall, F1-Score, ROC-AUC, and Confusion Matrix.	Implemented	Yes	-
6	Web Application Deployment	Deploys the Flask application using Render and GitHub for online access.	Partial	No	-

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
